EDUCATION

National Institute of Engineering, Mysore

Sep 2023 – June 2027 (Expected)

B.E. in Computer Science and Engineering | CGPA: 8.77/10.0

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, DBMS, Computer Networks.
- Additional: OOP with Java

COMPETITIVE PROGRAMMING

- LeetCode: Solved 140+ problems spanning Arrays, Strings, Linked Lists, Trees, Binary Search with a strong focus on data structures and algorithmic problem-solving.

PROJECTS & ENGINEERING EXPERIENCE

CI/CD Automation Pipeline – Food Delivery Web App | DevOps Engineer · 2-Member

Team React, Node.js, Docker, Jenkins

- Reduced manual deployment effort by designing a multi-stage Jenkins pipeline that automated build, test, and deployment steps triggered directly from GitHub commits.
- Achieved consistent, environment-agnostic deployments by containerizing all application services with Docker and orchestrating them via Docker Compose.
- Enabled automated end-to-end deployment testing by integrating ngrok to expose local Jenkins webhooks for real-time build triggering.

Deep Learning-Based Lung Cancer Detection | ML Engineer · 3-Member

Team Python, TensorFlow/Keras, CNN, Streamlit

- Designed and trained a CNN model on preprocessed medical imaging data with optimized feature extraction, reaching classification accuracy in testing.
- Built an interactive Streamlit interface for scan upload and real-time prediction.
- Improved model reliability by validating predictions across varied edge-case image samples.

AI-Powered Medical Receptionist | AI Engineer · 3-Member Team Python, React.js,

Node.js, Express.js, Gemini, Deepgram.

- Built an AI-powered medical receptionist that handled natural-language patient queries and automated appointment booking, rescheduling, and cancellation.
- Integrated Deepgram speech-to-text, Gemini/Groq LLMs, and Twilio APIs to enable conversational voice interactions and automated appointment confirmations.
- Developed multilingual patient assistance and validated response accuracy through testing across diverse patient queries.

TECHNICAL SKILLS

Languages: Java, Python

Web Technologies: HTML, CSS, Node.js

Databases: MySQL, MongoDB

Cloud & DevOps: Docker, Jenkins, Git, GitHub

Systems & Scripting: Unix, Shell scripting

Core Concepts: Data Structures and Algorithms, Operating Systems, DBMS, Object-Oriented Programming
